

akewa* Inventory management

All ERP solutions have an inventory function but you have to do it manually. Why don't you use an inventory software module running under most hand held computer operating systems available ?

Thanks to W-Inventory, you can do your inventory in few hours!

Can I use W-Inventory for year end stock take and my fixed assets ?

Akewa* W-Inventory software can be used either for your warehouse or for asset management. The package also allows you to store photo images of your assets.

Which hand held computers works with akewa* Inventory ?

akewa* W-Inventory is compatible with any hand held computers running under MicroSoft o/s, named Dot Net, with or without barcode reader.

Can I read any products by using their barcode ?

At any time, you can read the part number either by manually entering manually the code or by reading the barcode.

Can I import information such as the part number list from my ERP ?

Yes you can import data from up to 25 types of database or file into W-Inventory.

Where will the information be stored ?

The data collected will be stored either in a SQL or MS- Access database. This data information can be re-exported to your ERP before or after any modifications.
